The Role of Complement in Neurological Disorders

Bella Center Copenhagen | Hall M1
Copenhagen, Denmark
Sunday, 29 May | 18:30 - 20:00

A light reception will be provided at 18:15
The Role of Complement in Neurological Disorders

Overview:
Complement plays a role in several neurological disorders, including NMO, MG, and neuropathies. Join us to learn about the complement cascade, its role in tissue damage, and the heterogeneity of patients across complement-mediated neurological disorders. Our faculty panel will conclude with a live question-and-answer session.

No CME/CNE credits are associated with this program.

Agenda:
18:30 – 18:40
Welcome and Introductions
Saiju Jacob, MBBS, MD, DPhil, FRCP (Lon)
